1. Soviet troops (mainly infantry) are building concrete defense works along the coast from Kolberg (M14) to Köslin (M15).
2. With German aid the Soviets have built trans-shipment facilities at Stolpmünde (G80). There is a constant flow of material, mostly factory machinery being shipped from Stolpmünde to the U.S.S.R. Germans for deportation are also embarked at Stolpmünde.
3. Not far north of Stargard (G85) there is a munitions factory where German workers are employed under Soviet control. Large caliber ammunition (bombs, torpedoes or V-projectiles) is being sent secretly from this factory to Stolpmünde from where it is shipped. On 15 October 1946, the factory appeared to be working at full pressure.
